COVID-19: Adult Inpatient Treatment

**Recent Updates:**
- Updated on 2/18/2021
- Updated on 2/22/2021

**Resources:**
- UCM Coronavirus (COVID-19) Resource Center
- QPI Contact: jjacoby@bsd.uchicago.edu

**Care Locations:**
- Consult Spiritual Care
- Consult Diabetes Care
- Consult Respiratory Care
- Consult Thrombosis
- Consult Family Support

**Clinical Questions:**
For clinical questions regarding the care of COVID PUIs or COVID patients, contact the UCM Coronavirus (COVID-19) Resource Center at jjacoby@bsd.uchicago.edu.

**Support Services to CONFIRM in Person:**
- Consult Spiritual Care
- Consult Diabetes Care
- Consult Respiratory Care
- Consult Thrombosis
- Consult Family Support

**Exposure:**
- If not ordered yet, order:
  - COVID-19 Labs order set
  - General ID (p30028)
  - Type and Screen
  - Urine strep pneumo Ag
  - COVID-19: Inpatient
  - Pregnancy Test

**COVID-19:**
- When patient is ready for discharge, discuss with consultants (ID and/or if symptom onset within 10 days, if they meet any of the criteria listed:
  - BMI >=35
  - Baseline functional capacity significantly compromised
  - Underlying lung or systemic disease that would result in increased oxygen requirement
  - Significant work of breathing not alleviated by inhaled bronchodilators
  - Signs of shock or hemodynamic instability
  - Respiratory failure

**Antiviral Treatments:**
- Remdesivir + CMP
- Dexamethasone tablet
- Dexamethasone injection

**Therapies:**
- Remdesivir + CMP
- Dexamethasone tablet
- Dexamethasone injection

**Monoclonal Antibody Therapy:**
- Monoclonal antibody therapy (e.g. Casirivimab/imdevimab) may be considered for inpatients admitted for reasons other than COVID-19 until approved by the COVID-19: Inpatient Who Is HNDC? box for management

**Not Recommended:**
- Antiviral treatments are NOT recommended for the treatment of confirmed SARS-CoV-2 infection with severe OR life-threatening disease. Better to transfuse in first 10 days of disease than later

**Results:**
- Thrombosis
- Diabetes Care
- Respiratory Care
- Thrombosis
- Family Support

**Additional Orders:**
- COVID-19: Inpatient
- Pregnancy Test
- COVID-19: Inpatient
- Type and Screen
- Urine strep pneumo Ag
- COVID-19 Labs order set

**COVID+PUIs:**
- Indicate who is following up test results.
- If applicable, indicate it is a lab only and that patient does not need eval and is being followed for lab results.
- Email COVID+PUIclinic@uchospitals.edu

**Contact Precautions:**
- Confirm that contact information in demographics is correct (p30028)

**Further Development:**
- COVID-19: Inpatient
- COVID-19: Inpatient
- COVID-19: Inpatient

**For patients who are immunosuppressed, discuss with consultants (ID and/or if symptom onset within 10 days, if they meet any of the criteria listed:
- BMI >=35
- Baseline functional capacity significantly compromised
- Underlying lung or systemic disease that would result in increased oxygen requirement
- Significant work of breathing not alleviated by inhaled bronchodilators
- Signs of shock or hemodynamic instability
- Respiratory failure

**Antiviral Treatments:**
